---

### **CALL TO ORDER**

### **TOPICS**

- **FRED Transit Development Plan – Final Report**

The FRED Transit Development Plan is now complete. The purpose of the work session is to provide the Council with background on the TDP and its related “vision statement” and to identify the key issues raised by the TDP regarding the future of FREDericksburg Regional Transit. The Plan is an important document for leveraging state and federal grants, because it gives our funding partners a clear picture on the direction and pace of growth of the system. Mr. Frank Spielberg of BMI-SG and the staff will lead the discussion. We have also invited the Public Transit Advisory Board to participate. (See attached TDP and staff summary.)

The Council has adopted the following initiative as part of the 2005-2006 Goals & Initiatives:

*“Complete a planning study of the future of the FREDericksburg Regional Transit system to examine the effects of expansion. Determine whether FRED should continue as a City department or become a regional entity.”*

### **ADJOURNMENT**
